

# Cyber Asset Attack Surface Management Platform

Easily identify, analyze, and secure your cyber assets and attack surface with OctoX Labs. Gain full visibility into your complex environments to uncover threats, close compliance gaps, and prioritize risk. Strengthen the foundation of your security program with OctoX Labs.

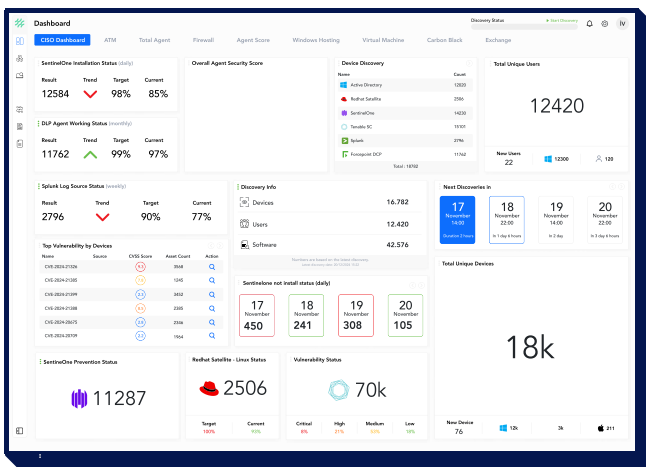

**450+**  
Integrations

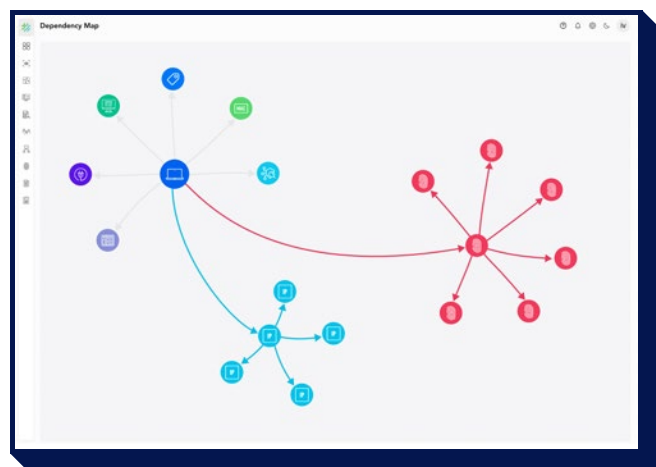

**Deploy**  
in minutes

**Predefined**  
dashboards

**Reduce**  
MTTD & MTTR

**Cyber Asset Visibility & Risk Management**

**Dependency Map**

**95%** of enterprises discover they only have security controls for **85%** of their asset ecosystem. This introduces critical security gaps and elevated risk of a data breach because you can't protect what you don't know you have.

**Highest Rated Vendor**

**4.9/5** ★★★★★

# Key Benefits

## Get a Credible, Comprehensive Inventory

Aggregate data from all sources that know about assets to gain a comprehensive and accurate asset inventory of all devices, users, cloud assets, software applications.

## Identify Gaps And Risk In Security Coverage

Understand when assets are missing critical security controls, when they have unsanctioned or vulnerable software, when misconfigurations create security gaps, or when known vulnerabilities exist in your environment.

## Validate And Enforce Policies

Automatically validate policies and decide which custom actions to trigger any time an asset doesn't adhere to your policy or expectations.

# Use Cases

## Asset Discovery

Unmanaged vs. Managed Devices  
Ephemeral Devices (containers, VMs)

## User inventory

User account tracking and management  
User to device(s) association

## Policy Management

User password policy enforcement  
User privilege monitoring

## Endpoint Management

Agents coverage and health  
Non Functioning Agents

## Cloud Management

Multi-cloud inventory and tracking

## Security Operations

Contextualized alert triage and incident response  
Vulnerability assessment coverage and CVE prioritization

## Software Management

3rd party software tracing  
Unsanctioned and EOL software

## Automated Actions

Isolate related machines Notify teams (email, teams, slack, ticketing services) when assets don't meet policies

# How It Works

## 1 Choose Your Deployment Option

Deploy OctoXLabs as a customer- hosted (on-premise/ cloud) solution.

## 2 Connect Adapters

Connect to the different solutions you already use with Adapters - predefined integrations on the OctoXLabs platform.

## 3 Examine Your Assets And Take Action

OctoXLabs provides a fully unique list of devices, users, software, cloud assets in your environment, so you can discover and detect risk and created actionable alert when policies aren't met.
